

# Test IIS Server Settings and Services

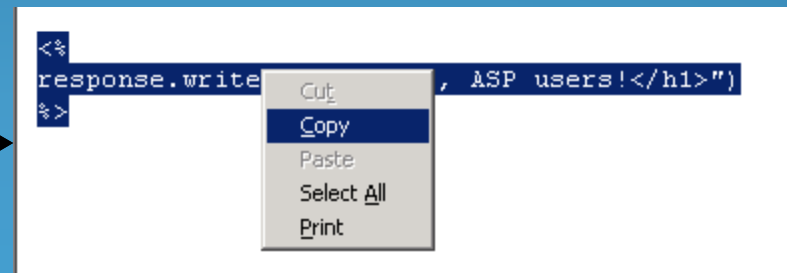

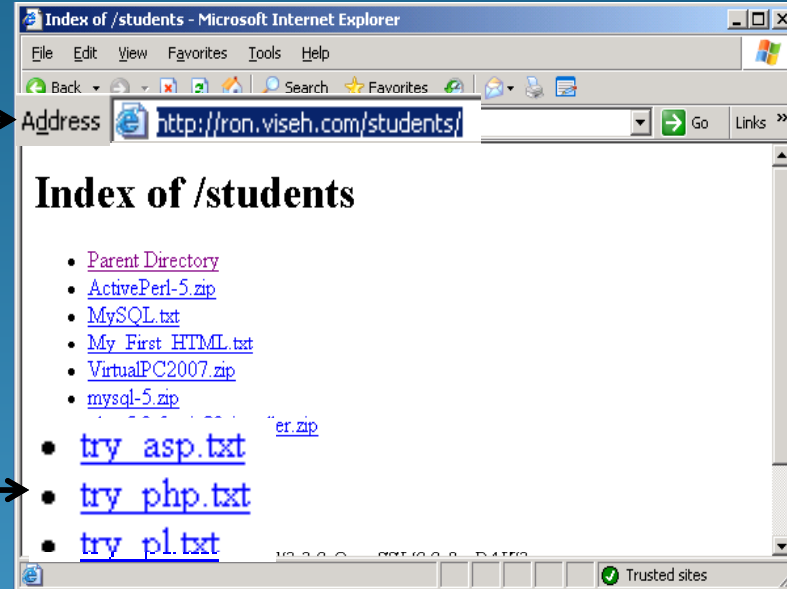

# Test IIS Settings

- Open Internet Explorer
- Go to:  
*http://ron.viseh.com/students*

For each of the following files:

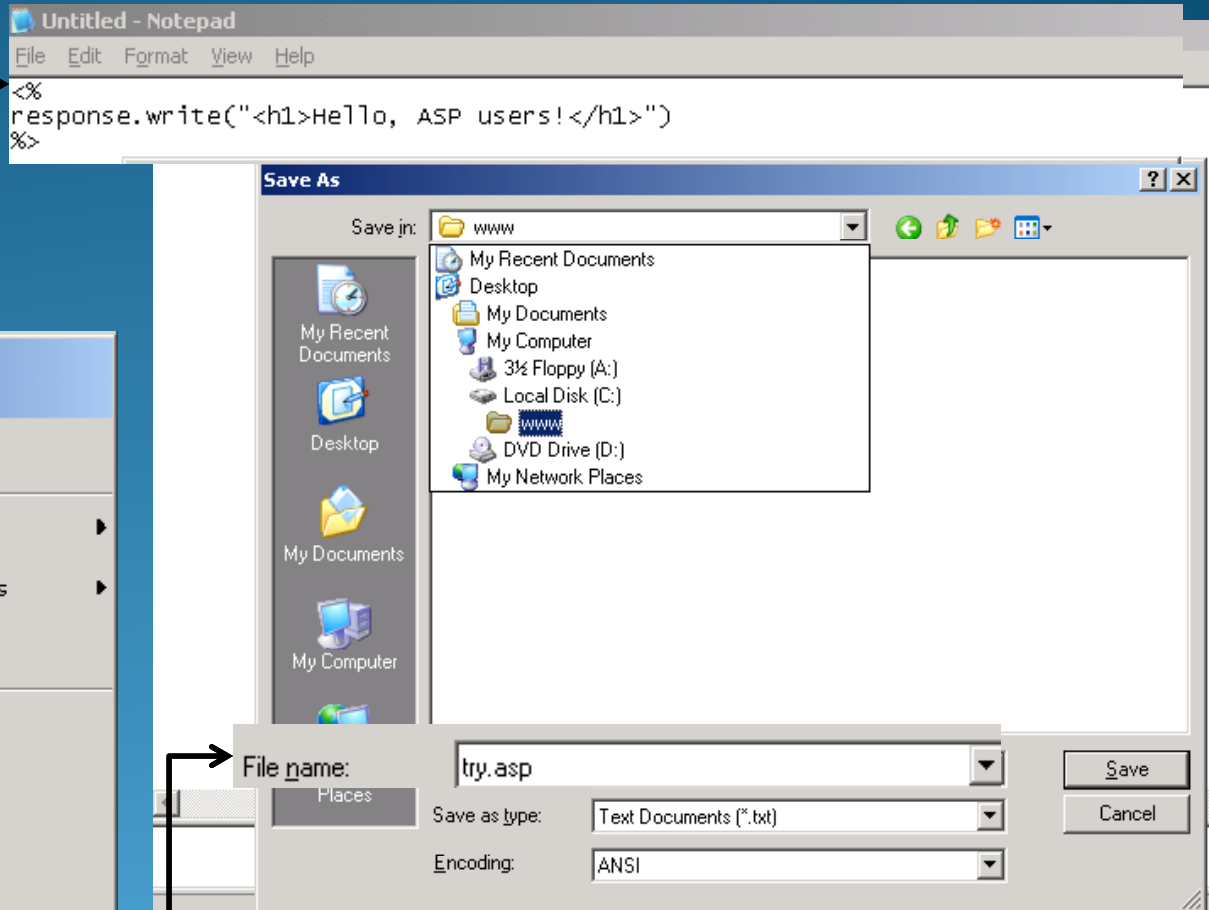

try\_asp.txt  
try\_php.txt  
try\_pl.txt

- Click the hyperlink
- Copy the text  
(cont'd on next page)

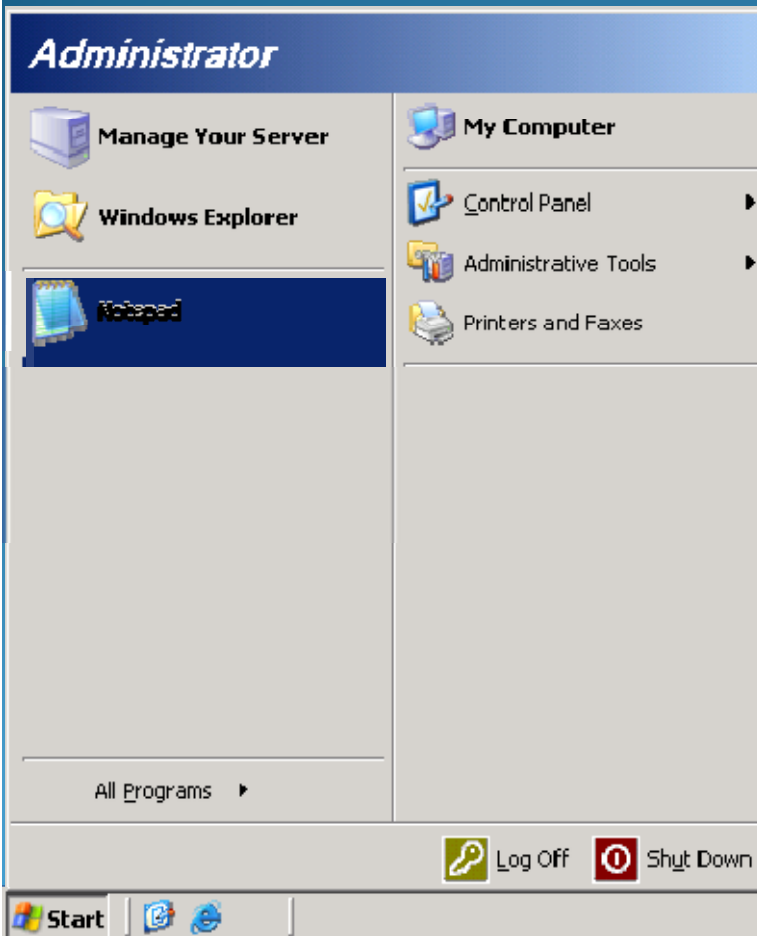

# Test IIS Settings

- Open "Notepad"
- Paste in "Notepad"

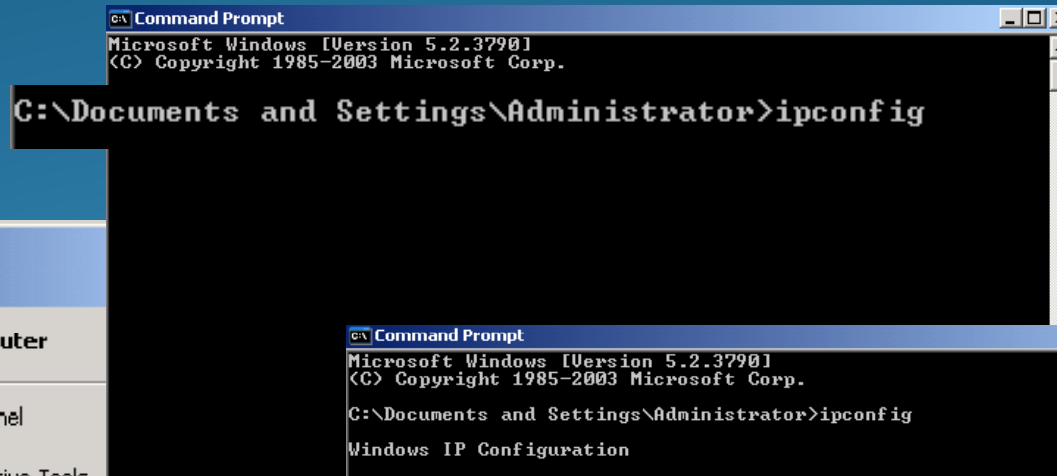

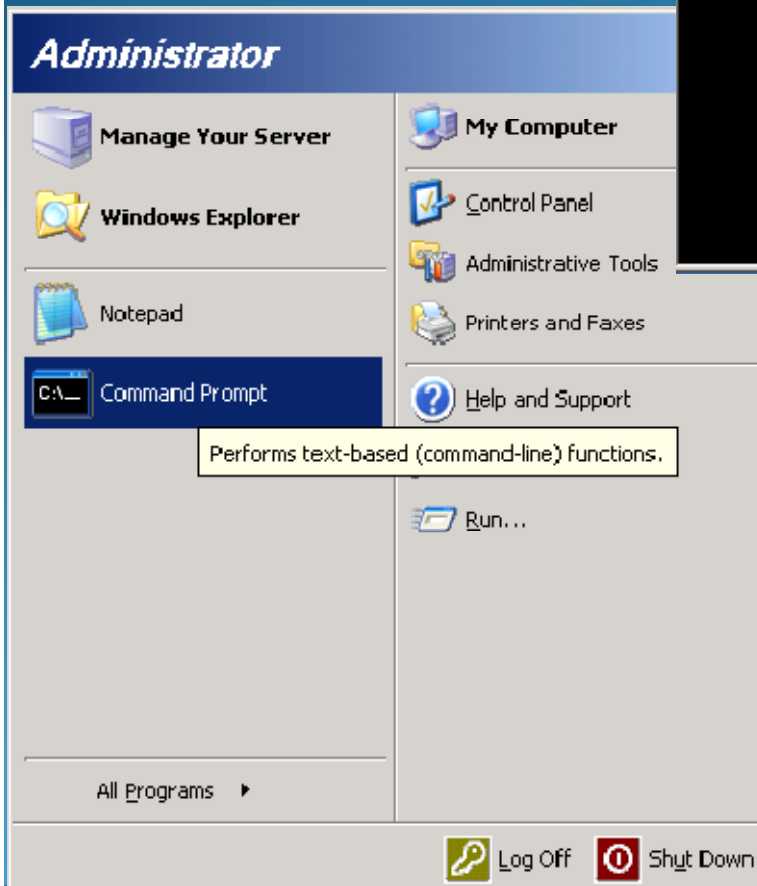

- Save in C:\www as:  
try.asp  
try.php  
try.pl  
(respectively)

# Test IIS Settings

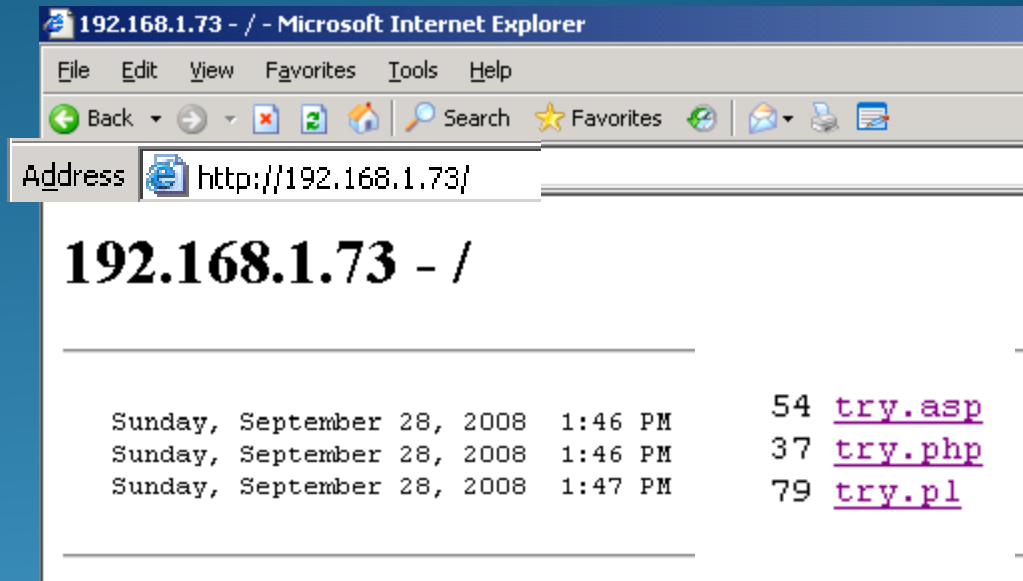

- Open the “Command Prompt”
- Type: ipconfig
- Hit Enter

- Find the IP Address and write it down  
In this case, the IP Address is:  
192.168.1.73

# Test IIS Settings

- Type the IP Address into the “Address” field in Internet Explorer
- Hit Enter
- Click each link and test that the installation is successful

ASP

Hello, ASP users!

PHP

PHP

PERL

Hello, world

If the tests matched, you have  
successfully configured an IIS  
Server.
